

FormGuard — Security & Privacy Overview

LidaBan Studio · formsuite.dev/formguard · Prepared for district procurement review · October 2026

Product Google Forms™ add-on (Google Workspace Marketplace): response caps, per-option quotas, scheduled close/reopen, owner alerts.	Data collected None. No student or respondent data is read, transmitted, stored, or logged by the vendor.
--	--

ARCHITECTURE: ZERO DATA COLLECTION

Configuration storage	All FormGuard settings are stored as properties <i>inside the customer's own Google Form</i> — within the district's Google Workspace tenant, under district control.
External calls	The add-on runtime performs no external network requests. There is no vendor server in the data path.
Response data	Form responses are never read. The add-on toggles form acceptance and option visibility only.
Notifications	Optional alerts are sent by the form owner's own Google account to recipients the owner chooses.

PRIVACY AGREEMENTS & COMPLIANCE

CA-NDPA	California Student Data Privacy Agreement v1.5 fully executed with San Bernardino City USD via CITE Privacy Services — Document Ref GMWHH-DGNBA-TUZMK-XBM4S , term through September 26, 2029. Exhibit E piggyback available to California districts.
Marketplace	Published on Google Workspace Marketplace (Google-run security review of OAuth scopes; single sign-on via district Google accounts; no separate student login).
FERPA/COPPA posture	No education records or personal information are collected, so no data-processing beyond the executed DPA scope occurs.

PERMISSION SCOPES (ALL GOOGLE-VERIFIED AT INSTALL)

- Forms container UI — display the settings sidebar inside a form
- Form service — read/update the form's acceptance setting, options, and FormGuard's own configuration properties
- Script triggers — run scheduled close/reopen at times the form owner sets
- Owner mail — send alerts from the form owner's own account to owner-chosen recipients

Full purpose-by-purpose list: formsuite.dev/formguard/permissions.html

OPERATIONS

Support & incidents	lidaban2025@gmail.com — acknowledged within one business day; security incidents reported to affected LEA contacts within 72 hours of confirmation.
Change practice	Versioned releases; behavior changes documented on the public changelog; no data model changes possible by design (no vendor-side data store).
Subprocessors	None for the add-on's core function. Payment/licensing (optional Pro tier) is handled by Creem (Merchant of Record) and involves license keys only — never student data.

Google Forms™ and Google Workspace Marketplace are trademarks of Google LLC. FormGuard is not affiliated with or endorsed by Google. This overview is a summary; the executed CA-NDPA governs.
